Re: Request for Information Regarding Capital and Expense Costs Associated
with the Sub-155 kV System.

Dear Mr. Johnson:

At the Portland Programs in Review meeting on June 25, 2004, I asked for further, more detailed information regarding BPA's sub-115 kV transmission facilities. In particular I am interested in the amount of replacements, maintenance and operations dollars that TBL forecasts it will spend on these facilities in the 2006-2007 rate period. Also, it would be very helpful if you could identify which local area reinforcements and load service projects involve improvements to sub-115 kV facilities.

If you could let me know when that information will be available, I would greatly appreciate it. Please let me know if there is anything you need from me in order to speed the processing of this request.

Thank you very much.

Sincerely,

Nancy Baker
Senior Policy Analyst
